TOGETHER.

WARNING
NO HELMET CAN PREVENT SERIOUS HEAD OR NECK INJURIES A PLAYER MIGHT RECEIVE WHILE PARTICIPATING IN FOOTBALL.
Do not use this helmet to butt, ram or spear an opposing player. This is in violation of the football rules and such use can result in severe head or neck injuries, paralysis or death to you and possible injury to your opponent.
Contact in football may result in **CONCUSSION-BRAIN INJURY** which no helmet can prevent. Symptoms include: loss of consciousness or memory, dizziness, headache, nausea or confusion. If you have symptoms, immediately stop playing and report them to your coach, trainer and parents. Do not return to a game or practice until all symptoms are gone and you have received **MEDICAL CLEARANCE**. Ignoring this warning may lead to another and more serious or fatal brain injury.

- Do not use your helmet to butt, ram or spear an opposing player.
- Use of the helmet with improper blocking and/or tackling techniques may result in serious injury.
- **No** protective product can prevent the inherent physical risks of football.
- Know what your equipment can and cannot do. This includes your helmet, face mask, shoulder pads, and all protective padding.
- Listen to your coach, athletic trainer and equipment manager.
- If the fit of your helmet changes, notify your coach, athletic trainer and equipment manager immediately.
- For more equipment fitting information, please visit: www.riddell.com/properfit/

DO NOT ALTER YOUR EQUIPMENT!

It is important that you wear professionally manufactured equipment.

The National Athletic Equipment Reconditioners Association (NAERA) requires any "After Market Enhancements" to be removed when football helmets are reconditioned/recertified, and reattaching the device will invalidate the helmet certification or recertification. (View NAERA Press Release at www.naera.net/).

SPEARING

Illegal and Dangerous to Both Players

BUTT BLOCKING

Illegal and Dangerous to Both Players

FACE TACKLING

Illegal and Dangerous to Both Players

TARGETING

Illegal and Dangerous to Both Players

A significant danger in these techniques is that too often the player's head is not in the proper position when contact is made with the opponent. The neck is the most vulnerable to injury when your head is down. Your head goes down because improper technique is being used. A blow to the top of the head when the neck is straightened is the most frequent cause of permanent injury. Only legal techniques should be taught and practiced.
